DETAILED ACTION

Terminal Disclaimer

1. The terminal disclaimer filed on 11/5/03 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of any patent granted on Application No. 09/654,191 has been reviewed and is accepted. The terminal disclaimer has been recorded.

Allowable Subject Matter

2. Claims 1-10 are allowed.

3. The following is an examiner's statement of reasons for allowance: the closest prior art of record fails to disclose or teach a method for detecting analyte, wherein the reaction of liquid sample and an analyte-reaction reagent produces a solution of a first coil-forming peptide that is then contacted with a biosensor having immobilized on a surface thereof a second, oppositely charged coil-forming peptide, such that a stable alpha-helical coiled-coil heterodimer is formed on the detection surface of the biosensor. The formation of the heterodimer alters the signal generated by the biosensor, which signal is then measured and correlated to the presence of analyte.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
